Summary

Recent Economics graduate with hands-on experience in quantitative modeling, financial analysis, and data-driven strategy. Proven ability to translate complex datasets into actionable insights across research, operations, and consulting contexts. Actively leverages AI tools to accelerate analysis and decision-making.

Education

University of California San Diego Sep 2022 – Jun 2025
Bachelor of Science, Economics San Diego, CA
Relevant Coursework: Corporate Finance, Financial Modelling, Advanced Econometrics (Time Series), Microeconomics, Macroeconomics, Statistics, Game Theory, Data Analytics, Management Consulting Projects

Experience

Administrative Assistant – Data & Operations Jan 2026 – Present
SH Medical San Mateo, CA

- Streamlined billing audit workflows using AI-assisted data review, improving charge accuracy and reducing documentation discrepancies across high-volume patient records.
- Validated large-scale operational datasets ensuring consistency, accuracy, and regulatory compliance.
- Optimized cross-functional workflows across scheduling, referrals, and administration to improve service delivery.

Data Research Assistant – Quantitative Modeling Sep 2024 – Oct 2025
UC San Diego Economics Department San Diego, CA

- Engineered regression and time series models in R and Stata on 10K+ row datasets to evaluate pricing dynamics, market structure, and revenue behavior under varying competitive conditions.
- Modeled cost and revenue drivers for EV charging infrastructure, informing faculty research on supply-demand imbalances across geographic markets.
- Distilled econometric outputs into executive-ready strategic briefs, supporting faculty data-driven decision-making.

Academic Success Program Resource Coordinator May 2024 – Jun 2025
Students Promoted Access Center for Education and Services San Diego, CA

- Led a 3-person team supporting a 400+ student program, driving a 20% improvement in participation through targeted engagement initiatives.
- Managed a \$60K operating budget using Excel-based financial models, improving fund utilization by 15%.
- Designed Power BI KPI dashboards to track program performance metrics and report outcomes to stakeholders.

Public Affairs Student Intern May 2023 – Oct 2023
ERC at UC San Diego San Diego, CA

- Identified 9% budget optimization opportunity through vendor cost analysis, supporting resource reallocation decisions.
- Consolidated financial tracking and reporting data to support program planning and stakeholder review.

Market Strategy and Design Intern May 2022 – Sep 2022
Danish Display Kodaikanal, TN

- Developed a data-driven e-commerce market entry and pricing strategy using competitive benchmarking and consumer demand analysis.
- Built financial models forecasting 40%+ ARR growth and a 3-year payback period on digital marketing ROI, presented to senior leadership.
- Designed skincare product positioning strategy, driving a 30% increase in quarterly sales through optimized targeting.

Projects

EVgo Charging Market Strategy | Independent Research Project Jun 2025 – Sep 2025

- Led a 5-person team to build a geospatial modeling framework analyzing EVgo supply-demand imbalances, integrating pricing data, demographic factors, and location characteristics across markets.

Uber Autonomous Ride Adoption | Consulting Project Lead Mar 2025 – Jun 2025

- Analyzed autonomous ride adoption across key consumer segments using primary interviews and competitive research; delivered go-to-market strategy projecting 50% rider adoption and 25% new user growth in 6 months.

Skills

Technical: Python, R, Stata, SQL, Excel (Advanced), Power BI, PowerPoint
AI & ML Tools: Claude, ChatGPT, Perplexity, GitHub Copilot
ML Methods: Linear & Logistic Regression, Time Series Analysis, Forecasting Models
Analytics: Financial Modeling, Unit Economics, Data Visualization, Feature Engineering, Prompt Engineering
Professional: Cross-functional Collaboration, Stakeholder Communication, Project Leadership
