Summary

Early-career analyst who builds data systems and AI-assisted tools for mission-driven organizations. Spent three years embedded in a fully student-run nonprofit at UC San Diego, coordinating a 400-student access program for first-generation and underrepresented communities. Currently applying behavioral economics and quantitative modeling in healthcare. Committed to using AI practically and equitably, in organizations where the stakes are real.

Education

University of California San Diego

Bachelor of Science, Economics

Sep 2022 – Jun 2025

San Diego, CA

Relevant Coursework: Corporate Finance, Financial Modelling, Advanced Econometrics (Time Series), Microeconomics, Macroeconomics, Statistics, Game Theory, Data Analytics, Management Consulting Projects

Experience

Administrative Assistant – Data & Operations

SH Medical

Jan 2026 – Present

San Mateo, CA

- Applying behavioral economics research to healthcare scheduling, investigating how patient symptom states at booking predict no-show behavior using pollen count data as an objective proxy.
- Validated and managed large-scale operational datasets ensuring consistency, accuracy, and regulatory compliance across scheduling, referrals, and administrative systems.

Data Research Assistant – Quantitative Modeling

UC San Diego Economics Department

Sep 2024 – Oct 2025

San Diego, CA

- Engineered regression and time series models in R and Stata on 10K+ row datasets to evaluate pricing dynamics, market structure, and revenue behavior under varying competitive conditions.
- Modeled cost and revenue drivers for EV charging infrastructure, informing faculty research on supply-demand imbalances across geographic markets.
- Distilled econometric outputs into executive-ready strategic briefs, supporting faculty data-driven decision-making.

Academic Success Program Resource Coordinator

Students Promoted Access Center for Education and Services

May 2024 – Jun 2025

San Diego, CA

- Led a 3-person team supporting a 400+ student program, driving a 20% improvement in participation through targeted engagement initiatives.
- Managed a \$60K operating budget using Excel-based financial models, improving fund utilization by 15%.
- Built Power BI dashboards to track program KPIs and present data-driven reports to university stakeholders; trained team members to maintain and update systems independently to ensure continuity beyond my tenure.

Public Affairs Student Intern

ERC at UC San Diego

May 2023 – Oct 2023

San Diego, CA

- Identified 9% budget optimization opportunity through vendor cost analysis, supporting resource reallocation decisions.
- Consolidated financial tracking and reporting data to support program planning and stakeholder review.

Market Strategy and Design Intern

Danish Display

May 2022 – Sep 2022

Kodaikanal, TN

- Developed a data-driven e-commerce market entry and pricing strategy using competitive benchmarking and consumer demand analysis.
- Built financial models forecasting 40%+ ARR growth and a 3-year payback period on digital marketing ROI, presented to senior leadership.
- Designed skincare product positioning strategy, driving a 30% increase in quarterly sales through optimized targeting.

Volunteer Experience

Volunteer Fundraising Coordinator

Marpu Foundation

Jul 2024 – Sep 2024

- Led a fundraising campaign to source and distribute educational supplies to underprivileged children; coordinated donor outreach and managed supply tracking from goal-setting through delivery.

Projects

EVgo Charging Market Strategy | Independent Research Project

Jun 2025 – Sep 2025

- Engineered an R-based data pipeline to convert raw California DMV vehicle registration records into zip-code-level EV adoption metrics, categorizing 10K+ vehicles by manufacturer, fuel type, and charging plug compatibility to identify infrastructure gaps.
- Modeled supply-demand imbalances across neighborhoods by integrating housing density, renter-occupancy rates, income, education, and commute patterns as proxies for EV adoption and peak demand behavior.
- Applied behavioral economics frameworks including rational inattention, price salience, and nudge theory to analyze how price transparency affects consumer charging station choice and firm pricing strategy.

Uber Autonomous Ride Adoption | Consulting Project Lead

Mar 2025 – Jun 2025

- Analyzed autonomous ride adoption across key consumer segments using primary interviews and competitive research; delivered go-to-market strategy projecting 50% rider adoption and 25% new user growth in 6 months.

Skills

AI Tools: Claude (prompt engineering, workflow design, research analysis), ChatGPT, Perplexity, GitHub Copilot

Technical: Python, R, Stata, SQL, Excel (Advanced), Power BI, PowerPoint

ML Methods: Linear & Logistic Regression, Time Series Analysis, Forecasting Models

Analytics: Financial Modeling, Unit Economics, Data Visualization, Feature Engineering, Prompt Engineering

Professional: Cross-functional Collaboration, Stakeholder Communication, Project Leadership
