Summary

BSc. in Economics from the University of California, San Diego with hands-on experience applying AI tools and quantitative research to real-world community challenges. Background spans student-run nonprofit coordination, independent behavioral economics research, and data-driven analysis in healthcare and energy systems. Committed to using AI to expand access, reduce inequity, and help mission-driven organizations make better decisions.

Education

University of California San Diego

Bachelor of Science, Economics

Sep 2022 – Jun 2025

San Diego, CA

- **Relevant Coursework:** Advanced Econometrics (Time Series), Data Analytics, Game Theory, Statistics, Microeconomics, Macroeconomics, Management Consulting Projects, Corporate Finance

Experience

Data Operations and Research Analyst

SH Medical

Jan 2026 – Present

San Mateo, CA

- Applying behavioral economics research to healthcare scheduling, investigating how patient symptom states at booking predict no-show behavior using pollen count data as an objective proxy.
- Validated and managed large-scale operational datasets ensuring consistency, accuracy, and regulatory compliance across scheduling, referrals, and administrative systems.

Data Research Assistant – Quantitative Modeling

UC San Diego Economics Department

Sep 2024 – Oct 2025

San Diego, CA

- Engineered R-based data pipeline converting 10K+ row California DMV registration records into zip-code-level EV adoption metrics, identifying infrastructure gaps across geographic and demographic contexts.
- Built regression and time series models to evaluate supply-demand imbalances in EV charging infrastructure, connecting findings to behavioral economics theory including rational inattention and nudge theory.

Resource Coordinator – Community Access and Equity Programs

SPACES (Student Promoted Access Center for Education and Services), UC San Diego

May 2024 – Jun 2025

San Diego, CA

- Coordinated a 400+ student academic success program at a fully student-run nonprofit focused on educational equity, access, and retention for first-generation and underrepresented communities at UC San Diego.
- Led a 3-person team to design and deliver targeted engagement initiatives, increasing program participation by 20% and improving outcomes for underrepresented students.
- Managed a \$60K operating budget using Excel-based financial models, improving fund utilization by 15% to maximize impact for the communities served.
- Built Power BI dashboards to track program KPIs and deliver data-driven reports to university stakeholders, informing future program design.

Market Strategy and Design Intern

Danish Display

May 2022 – Sep 2022

Kodaikanal, TN

- Developed a data-driven e-commerce market entry strategy using competitive benchmarking; built financial models forecasting 40%+ ARR growth presented to senior leadership.

Independent Research

Projection Bias and No-Show Behavior in Outpatient Allergy Scheduling

2026 – Present

- Testing whether patients booking during high-symptom periods overestimate future care demand and no-show when symptoms subside (projection bias, Loewenstein et al., 2003). Applying logistic regression and mixed-effects models in R; pollen count data serves as objective symptom proxy.

EV Charging Infrastructure and Consumer Behavior | UC San Diego

Jun 2025 – Sep 2025

- Developed geospatial model and variable framework explaining EV charging supply-demand divergence across California communities; connected findings to rational inattention and nudge theory. Full paper: shifanyarul.github.io

Skills

AI Tools: Claude, ChatGPT, Perplexity, GitHub Copilot (prompt engineering) | **Technical:** Python, R, Stata, SQL, Excel (Advanced), Power BI

Methods: Logistic & Linear Regression, Time Series Analysis, Geospatial Analysis, Data Visualization

Professional: Community Outreach, Stakeholder Communication, Program Coordination, Project Leadership
